

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

TOA CORPORATION and its consolidated subsidiaries

1. Significant Respects for the Basis of Preparing Consolidated Financial Statements:

The accompanying consolidated financial statements of TOA CORPORATION (the "Company") and its consolidated subsidiaries (the "Companies") are prepared on the basis of accounting principles generally accepted in Japan, which are different in certain respects as to application and disclosure requirements of International Financial Reporting Standards, and are compiled from the consolidated financial statements prepared by the Company as required by the Financial Instruments and Exchange Law of Japan. Certain reclassifications and rearrangements were made for the convenience of readers outside of Japan.

As permitted by the Financial Instruments and Exchange Law of Japan, amounts of less than one million yen have been rounded down to the nearest million Japanese yen.

I. Basis of consolidation

The Company has 17 majority-owned subsidiaries as of March 31, 2018. The consolidated financial statements for the year ended March 31, 2018 include the accounts of the Company and 11 majority-owned subsidiaries. Principal consolidated subsidiaries were TOA Agency Co., Ltd., Shinko Corporation, TOA Kikai Kogyo Co., Ltd. Consolidated subsidiaries have the same financial period as the Company that ends on March 31.

Other 6 subsidiaries are not consolidated as they are at small scale and not significant in terms of total assets, net sales, retained earnings or net income in aggregate.

Investments in unconsolidated subsidiaries (Human Affair Co., Ltd. and others) and affiliates (Sengenyama Developing Co., Ltd. and others) are excluded from application of the equity method as they are not significant in terms of net income or retained earnings in aggregate.

II. Basis of accounting treatment

(1) Basis of valuation for significant assets

a) Securities

Securities held by the Companies are classified into two categories;

Held-to-maturity debt securities are carried at amortized cost.

Other securities for which market quotations are available are stated at fair value. Net Unrealized gains or losses on these securities are treated as directly charged or credited to the net assets and cost of securities sold are computed by the moving average method.

Other securities for which market quotation are unavailable are stated at moving average cost method.

b) Derivatives

With changes in fair value included in net income or loss for the period in which they arise, derivatives are stated at fair value.

c) Inventories

Cost on construction contracts in progress, PFI projects and real estate for sale are stated at specific cost method for each contract. Materials and supplies are stated at moving average cost method.

However, in the case that net selling value falls below the acquisition cost at the end of the period, inventories except for cost on construction contracts in progress are carried at the net selling value on the balance sheet, regarded as decreased profitability of assets.

(2) Depreciation for property, plant and equipment and other

Except for leased assets, depreciation is principally computed by the declining-balance method at rates based on the estimated useful lives. However, depreciation of buildings which the Companies acquired on or after April 1, 1998, and facilities attached to buildings and other non-building structures acquired on or after April 1, 2016 are computed on a straight-line basis over the estimated period. Useful lives and residual value are in conformity with the provisions of the Corporation Tax Law of Japan.

As for intangible fixed assets excluding leased assets and long-term prepaid expenses, amortization is computed by the straight-line method and the useful lives are in conformity with the provisions of the Corporation Tax Law of Japan.

As for leased assets related to finance lease, other than those which are deemed to transfer ownership of the leased assets to the lessee, depreciation is principally computed by the straight-line method over the useful lives equivalent to lease term and residual value is equal to zero.

(3) Reserve and allowance

a) Allowance for doubtful accounts

Allowance for general receivables are established in amounts considered to be appropriate based upon credit loss experience. For specific receivables such as doubtful accounts, allowance for these are established in amounts considered to be uncollectible based upon an evaluation of possibility of collection in each outstanding receivable.

b) Reserve for indemnity on completed contracts

Reserve for indemnity on completed contracts is provided for the future defect expenses based upon the estimated indemnity amount for net sales for the year.

c) Reserve for loss on construction works

Reserve for loss on construction works is provided for the amount equivalent to cover future loss by evaluating individual construction form which loss is assumed and estimated.

d) Reserve for loss on construction defects

Reserve for loss on construction defects is provided for the amount equivalent to cover future defect expenses based upon the estimated repair costs for construction defects for soil investment projects.

(4) Retirement benefits

Liabilities for retirement benefits has been provided on an accrual basis as of the balance sheet date based on an estimate of the projected benefit obligation and the employees' pension plan assets.

To calculate projected benefit obligation, the benefit formula method is used to allocate expected retirement benefit payments to the each period through current fiscal year-end.

Actuarial gain or loss is amortized by the straight-line method over a defined period (13 years), not exceeding the average remaining service period of the employees from the next fiscal year after the incurrence.

Certain consolidated subsidiaries apply the simplified method which assumes retirement benefit obligation to be equal to the benefits payable assuming voluntary retirement of all employees at fiscal year-end.

(5) Recognition of contract revenue and cost

The Companies adopt the percentage-of-completion method for revenue recognition for the construction-type contracts where the outcome of the construction activities by the end of this year can be reliably estimated.

Completion method is adopted otherwise. The percentage of completion is measured by the ratio of the costs incurred to the estimated total costs for each contract.

(6) Hedge accounting

Gains or losses arising from changes in fair value of the derivatives designated as "hedging instruments" are deferred as a component of net assets and included in net income or loss in the same period during which the gains and losses on the hedged items or transactions are recognized.

For interest rate swaps, if certain hedging criteria are met, interest rate swaps are not recognized at their fair values but an alternative (short-cut) method under Japanese accounting standards is applied by which the amounts received or paid for such interest swap arrangements are recognized as interest over the life of each of the arrangements.

The derivatives designated as hedging

instruments by the Companies are principally interest swaps and forward exchange contracts. The related hedged item is bank loans and foreign currency monetary liabilities and forecasted transactions.

The Companies have a policy to utilize the above hedging instruments in order to reduce the Company's exposure to the risk of interest rate fluctuation and foreign exchange fluctuation. Thus, the Company's purchases of the hedging instruments are limited to, at maximum, the amounts of the hedged items.

The Companies evaluate effectiveness of its hedging activities by reference to the accumulated gains or losses on the hedging instruments and the related hedged items from the commencement of the hedges.

(7) Scope of cash and cash equivalents

Cash and cash equivalents in the consolidated statement of cash flows and composed of cash on hand, bank deposits which are able to be withdrawn on demand and short-term investment with an original maturity of three months or less and which represent a minor risk of fluctuation in value.

(8) Consumption taxes

Transactions subject to consumption taxes are recorded at amounts exclusive of consumption taxes.

(9) U.S. Dollar amounts

The dollar amounts included in the financial statements and notes thereto represent the arithmetical results of translating yen to dollars at rate of ¥106=US\$1, the approximated rate of exchange prevailing on March 31, 2018. The inclusion of such dollar amounts is solely for the convenience of readers outside of Japan and is not intended to imply that yen and assets and liabilities originating in Yen have been or could be readily converted, realized or settled in dollars at this or any other rates.

Amounts less than one thousand have been rounded down to the nearest thousand dollars.

2. Issued but not yet adopted accounting standard and others

Accounting Standard and Implementation Guidance on Revenue Recognition.

On March 30, 2018, the ASBJ issued "Accounting Standard for Revenue Recognition" (ASBJ Statement No. 29) and "Implementation Guidance on Accounting Standard for Revenue Recognition" (ASBJ Guidance No. 30).

(1) Overview

This is a comprehensive accounting standard for revenue recognition. Specifically, the accounting standard establishes the following five-step model that will apply to revenue from customers:

1. Identify the contract(s) with a customer
2. Identify the performance obligations in the contract
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations in the contract
5. Recognize revenue when (or as) the entity satisfies a performance obligation

(2) Scheduled date of adoption

The Company expects to adopt the accounting standard and implementation guidance from the beginning of the fiscal year ending March 31, 2022.

(3) Impact of the adoption of accounting standard and implementation guidance

The Company is currently evaluating the effect of the adoption of this accounting standard and implementation guidance on its consolidated financial statements.

3. Changes in Presentation

The Companies have changed the presentation of items in the consolidated statement of operations as follows:

Exchange gain (loss), net presented separately in the previous year, is included in Other, net of Other income (expenses) in the current year.

Additional severance payment and Commission fee included in Other, net of Other income (expenses) in the previous year, is presented separately in the current year.

To reflect this change in presentation, the Companies reclassified items of previous year in the consolidated statement of operations for the current year.

Consequently, Exchange gain (loss), net in the amount of ¥(88) million was included in Other, net and Additional severance payment and Commission fee were newly shown in the amount of ¥(78) million and ¥(42) million. Also Other, net of Other income (expenses) in the previous year was shown in the amount of ¥(125) million, compared with ¥(158) million previously presented.

10. Financial Instruments

I. Summary of financial instruments

a) Policy for financial instruments

The Companies limit its fund management to low-risk financial instruments, such as bank deposits in a short period and have a policy to raise low-interest funds through bank borrowings flexibly. The Companies utilize derivatives in order to reduce the risk of fluctuation in interest rates and foreign exchange rates for debts and credits in foreign currencies. The Companies, furthermore, utilize the hedging instruments for the purpose of stabilizing the cost on contracts and do not enter into derivatives for speculative purpose.

b) Contents of financial instruments, related risk and risk management

Notes and accounts receivable which categorized into operating receivables are exposed to client's credit risk.

These risks are reviewed at entering into contract and the concerned counterparts are managed by the administration headquarters in each case.

Investments in securities are exposed to fluctuation risks of market price.

Those securities are mainly shares of other companies with which the Company has business relationships and the Company monitors the monthly fair value.

Among the debt, short-term borrowings are principally applicable to funds for business activities and long-term debt (maturities are within five years in principle) are funds for capital investments. Long-term debt with variable interest rates are exposed to the risk of interest rate fluctuation. The Company utilizes derivatives which are the interest swaps in each contracts in order to avoid fluctuation risk of interest expenses and stabilize interest cost. In addition, the Company utilizes foreign currency exchange contracts to hedge foreign currency exposure of certain transactions related to construction work denominated in foreign currency.

Conducting of derivative transactions is managed by gaining approval by directors and derivatives provided by the highly-rated financial institutions are utilized in order to avoid credit risk.

c) Supplemental explanation for fair value of financial instruments

Notional amounts of derivatives are not indicative of the actual market risk involved in derivative transactions.

II. Fair value of financial instruments

a) Computation of fair value for financial instruments, investment in securities and derivative transactions

Assets

Cash and bank deposits, and advanced money in other current assets

Those accounts are carrying value, since those are settled in a short period and their fair value is equivalent to carrying amount approximately.

Notes and accounts receivable, trade

The most of its account are carrying value, since those are settled in a short period and their fair value is equivalent to carrying amount approximately.

Investments in securities

Fair value of investments in securities is based on market price at Stock Exchange or asking price from correspondent financial institution.

Liabilities

Notes and accounts payable, trade, electronically recorded obligations, operating, short-term borrowings, and deposits received in other current liabilities.

Those accounts are carrying value, since those are settled in a short period and their fair value is equivalent to carrying amount approximately.

Long-term debt

Fair value of long-term debt with variable interest rates is approximately equal to the book value because it reflects market interest rates in the short term.

Fair value of long-term debt with fixed rates is based on the present value of the total of principal and interest discounted by the interest rate to be applied in the event that similar new loans were entered into.

In addition, certain long-term debt with variable interest rates is hedged by interest rate swaps subject to the special treatment. The total amount of the principal and interest together with the corresponding interest rate swap is discounted using the interest rate to be applied, in the event that similar new loans were entered into.

Derivative Transactions

Please refer to Note 12, Derivative Transactions, of the notes the consolidated financial statement.

17.Information on Various Segments

I .Outline of the reportable segments

The reportable segments of the Companies are components for which discrete financial information is available and prepared for the regular review, so that the board of directors can make decisions on the distribution of management resources and evaluate the operating performance. The Company comprises "Civil Engineering General Headquarters" and "Building Construction General Headquarters", which control domestic construction businesses, and "International Division" for overseas businesses. Those Headquarters and International Division develop strategies comprehensively in each line of business and expand business activities.

Accordingly, the Company's businesses consist of segments classified by products and services based on the headquarters. The reportable segments are composed of "Domestic Civil Engineering Businesses", "Domestic Architectural Businesses", "Overseas Businesses" and principal activities in each segment are the following:

- 1) Domestic Civil Engineering Businesses: domestic civil engineering contracts, contracts related to design and others
- 2) Domestic Architectural Building Businesses: domestic architectural contracts, contracts related to design and others
- 3) Overseas Businesses: general overseas contracts

II .Computation for the amount of net sales, profits or losses and other items in each reportable segment

The accounting policies of the reportable segments are substantially equivalent to the description in Significant Respects for the Basis of Preparing Consolidated Financial Statements. Intersegment net sales and transfers are based on the current market price. Meanwhile, assets are not allocated to the business segments.
