# **Semiannual Report**

For the six months ended September 30, 2001

### **Message from the President**

Japan's economy for the six-month period ended September 30, 2001 showed no sign of recovery from long-term depression in spite of the Government's indication of structural reformation in finance and measures to stabilize monetary markets. Economy turned down to a phase of deflation in the midst of serious conditions such as continued sluggish personal consumption, the worst label of unemployment and decelerating world economy which have created severe conditions for corporation earnings.

The construction industry experienced extremely serious situations in the competition of new orders received and project profitability, due to the fact that public works continued to be inactive by delay of new orders reflected by financial stringency in the local governments even in the same amount of budget compared to the previous year. In addition, moderate private capital investment was caused by anxiety of economic recovery and investment in housing construction was decreased by slow-down in its demand.

Under these conditions, TOA CORPORATION and its consolidated subsidiaries put every effort into maintaining sales by integrating their management strength and securing profits by reducing construction costs and administrative expenses. As a result, new orders received on a non-consolidated basis during the period under review totaled ¥90,928 million (US\$764 million), a 23.4% decline from the same period of the previous fiscal year. Consolidated net sales totaled ¥99,856 million (US\$ 839 million) for the period under review, an increase of 15.5% over the same period of the previous fiscal year.

In earnings, net sales for the first half period of the fiscal year amount generally one third of total net sales of the fiscal year, which is a season-flexible factor in the construction industry. Therefore, loss before income taxes and minority interest amounted ¥1,860 million (US\$16)

million), due to the fact that devaluation of marketable securities and investment securities for the period under review totaling ¥781 million (US\$ 7 million) was included. As a result, consolidated net loss totaled ¥1,563 million (US\$ 13 million).

Japan's economy is concerned to accelerate recession more than ever in expectation that world economy will become more cloudy due to simultaneous multi-terrorism which happened on September 11, 2001 in the United States of America, domestic corporations centering on manufacture industries with turn down in business performance and financial institutes in Japan sharply decreasing their profits.

In these periods, the Government is especially expected to carry out its drastic operations. In the construction industry, a revised budget related to public works is currently difficult to expect expansion in the Governmental policy of financial restructuring, while private capital investment continues to be inactive. Therefore, we predict that competition for receiving new orders and effort to securing profits will intensify further for the time being. With the three-year plan in order to overcome difficult management environments, TOA and its group companies aim at expanding new orders, especially projects in their strong fields and put their effort to secure profitable works by posting costs and administrative expenses, while consolidated financial structure to stabilize foundation of management and establish corporate strength. In these endeavors, we ask our shareholders for the warm, continual support and cooperation.

January 2002

Masao Watanabe

Masao Watanabe

President
